Standard-setting and Related Projects			
Conceptual Framework			
A comprehensive project focusing on the elements of financial statements, measurement, reporting entity, and presentation and disclosure.	The IPSASB has made it clear that it is developing its own Conceptual Framework, not an interpretation of the IASB's Framework. However, the IASB's approach can inform the IPSASB's approach.	<p>On 28 January 2013, a discussion forum on the topic of disclosures in financial reporting was held. Key messages from the forum were communicated in a feedback statement on the disclosure forum issued on 28 May, 2013.</p> <p>A Discussion Paper was issued in July 2013 with a consultation period to 14 January 2014. Additionally, a series of Conceptual Framework outreach and roundtable sessions was held in London, Toronto, Sao Paulo and Tokyo, throughout October and November 2013.</p> <p>An ED was issued in May 2015 with a consultation period to 25 November 2015.</p> <p>Deliberations continue in regards to the Conceptual Framework. The current timeline for issuance of the Conceptual Framework is after 6 months.</p>	The IPSASB's timetable expects completion of its Framework in 2014 so it is likely to be in advance of the IASB in a number of areas.

presentation and disclosure requirements and to ensure entities are able to use judgement when preparing their financial statements. This project has multiple streams looking at different disclosure issues.		Statement is expected within 3 months.	
Insurance Contracts			
The overall aim of the project is to provide consistent and sound requirements for accounting for insurance contracts. The project has been conducted in 2 stages. Phase 1 culminated in the publication of IFRS 4, <i>Insurance Contracts</i> in 2004. Phase 2 will result in the replacement of IFRS 4.	There is no direct impact on IPSASs at present as the IPSASB does not have an IPSAS equivalent of IFRS 4. There are likely to be implications for the scope sections of IPSASs 28–30 when IFRS 4 is replaced.	An ED was issued in July 2010, with a consultation period that expired in November 2010. Roundtables were held in December 2010. A revised ED was issued on 20 June 2013 with a consultation period to 25 October 2013. An IFRS is expected after 6 months.	Accounting for insurance contracts has not generally been considered a high priority in IPSASB deliberations.
Amendments to IFRS 4: Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts			
The objective of this project is to address the temporary accounting consequences of the different effective dates of IFRS 9 and the new insurance contracts Standard.	Potential impact on the project to update IPSAS 28–30, <i>Financial Instruments</i> .	An ED was issued in November 2015 with a comment period to 8 February 2016. An IFRS is expected within 6 months.	Any changes to the effective date of IFRS 9, will be considered in the update to IPSAS 28–30 project.
Rate-regulated Activities			
An IASB project to consider whether IFRSs should require entities operating in rate-regulated environments to recognize assets and liabilities arising from the effects of rate regulation.	There is no direct impact on current IPSASs.	Interim IFRS: An ED was issued on 25 April 2013 with a consultation period to 4 September 2013. IFRS 14 <i>Regulatory Deferral Accounts</i> was issued in January 2014. This standard allows first-time adopters to continue to account for regulatory

amortization and impairment approach); and - The extent to which other intangible assets should be separated from goodwill.			
Discount Rates			
Many IFRSs specify, or refer to, the discount rate that must be used to discount estimates of future cash flows. Different Standards specify different discount rates, depending on the objective of the particular IFRS. Views received during the agenda consultation suggest that the reasons for using different discount rates are not well understood, with some respondents suggesting that such differences cause IFRS requirements to be inconsistent. This research project examines discount rate requirements in IFRS, and assesses whether there any inconsistencies that the IASB should address.	There are many IPSASB standards which reference discount rates in some manner, such as IPSAS 29, <i>Recognition and Measurement of Financial Instruments</i> and IPSAS 39, <i>Employee Benefits</i> .	A research summary is expected within 6 months.	
Share-based Payment			
The initial output of the Research Project is the staff paper presented to the IASB in November 2015. In May 2016 the IASB considered the findings of the research and the feedback from constituents. The	There is no direct impact on current IPSASs as the IPSASB does not have an equivalent standard.	A research summary is expected within 6 months.
