Agenda Item 7: Heritage

Bernhard Schatz and Gwenda Jensen

IPSASB Meeting
Washington D.C., USA
March 12–15, 2019
1. Background to discussion
2. Definition/description of heritage items
3. Heritage assets and their recognition
4. Presentation of information about heritage
7.2.1 Background to Discussion

• Purpose:
  – Provide background information on the Heritage Project
  – Confirm next steps for project (focus on heritage asset recognition)
7.2.1 Background to Discussion: Status and Progress in 2017

- CP, *Heritage*, published - April 2017
- Review of responses to the CP - December 2017
- Decision to defer further discussions until after measurement principles developed (Public Sector Measurement Project)
- Decision on approach going forward:
  - Develop application guidance on recognition of heritage assets, and include in IPSAS 17, *Property, Plant and Equipment*
  - Address measurement issues in IPSAS, *Measurement*
• Good support for many of the preliminary views, including that:
  – The special characteristics of heritage items do not prevent them being assets for financial reporting purposes; and
  – Heritage assets should be included in the financial statements, if they meet the recognition criteria in the Conceptual Framework.

• Many respondents had issues with respect to measurement of heritage assets
IPSASB is asked to:

(a) Note the information provided
(b) Confirm that next steps are to address heritage asset recognition
• Does IPSASB agree to defer discussion of a definition/description of heritage assets until after the IPSASB has firmed up its positions on their recognition and measurement?
Heritage CP’s description of “heritage items”—

- Items that are intended to be held indefinitely and preserved for the benefit of present and future generations because of their rarity and/or significance in relation, but not limited, to their archeological, architectural, agricultural, artistic, cultural, environmental, historical, natural, scientific or technological features.

CP responses to this description—

- 55% agreed with this description, 22% partially agreed, and 20% disagreed
- **Issues raised**: 1. Strengthen description /2 Add or remove types of heritage /3 Amend or address implications of “intend to be held indefinitely” /4 Address significance of “operational” heritage items
Project’s status report:
• CAG tentatively concluded that an extensive description or definition might not be needed for financial reporting for heritage
• Instead, an entity may need to:
  1. First, assess whether or not an item is an asset
  2. Second, determine whether the item is heritage
• If heritage assets are no different from other property, plant and equipment, or if the critical distinction is between operational/non-operational assets, rather than heritage/non-heritage, then do we need a definition?
Does the IPSASB agree to defer discussion of a definition for heritage assets until the need for such a definition becomes clearer?
• *Purpose*:
  – Provide background information on heritage asset recognition
  – Note that the Task Force will submit recommendations to the June meeting
7.2.3 Heritage Assets Recognition: Conceptual Framework

- Recognition criteria:
  - An item satisfies the definition of an element; and
  - Can be measured (qualitative characteristics and constraints)

- Asset: “a resource presently controlled by entity as result of past event”

- **Resource**: Has service potential or can generate economic benefits (EB):
  - Resource if can be used to provide services, where services may be to third parties
  - Notes that assets providing service potential include heritage assets
  - Use and disposal of public sector assets may be restricted

- **Control**: Able to use (or direct use) of resource - to derive benefits (achieve entity’s objectives, including service delivery objectives)
• 80% - agreed that the special characteristics of heritage items do not prevent them from being assets
• 78% - agreed that heritage assets should be recognized if they meet the recognition criteria

**Measurement difficulties** – impacting on recognition
• 68% - agreed that there are “heritage-related situations (or factors) in which heritage assets should *not* be recognized and/or measured because:
  – Not possible to assign a relevant and verifiable monetary value; or,
  – Cost-benefit constraint applies (costs do not justify the benefits)
7.2.3 Heritage Assets Recognition: Operational/ Non-operational
7.2.3 Heritage Assets Recognition: Operational/ Non-operational
7.2.3 Heritage Assets Recognition: Next steps

• Many heritage items are assets and should be recognized

• Next steps:
  – Focus on application guidance for heritage recognition
  – Apply the operational versus non-operational distinction (narrows the difficult area to non-operational heritage)
  – Museum collections – their valuation will be the challenge

• Heritage Task Force will submit recommendations on heritage asset recognition to the June 2019 IPSASB meeting
The IPSASB is asked to:

• **Note that** the Heritage Task Force will submit recommendations on recognition to June meeting

• **Provide views on** factors/ situations that Task Force should consider when developing the recommendations
Proposal: The Heritage Project should primarily focus on information in the financial statements

Background:

- PV: Heritage characteristics do not warrant specific presentation objectives
- CP responses: Some said disclosures and/or use of other reports would address heritage information needs
- Task Force Chair:
  - Disclosures cannot be a substitute for recognition of assets
  - Disclosures could be made in the Notes (financial statements) or other reports
7.2.4 Presentation of Information about Heritage

- A wider set of heritage-related information that needs to be publicly available?
- Other IPSAS pronouncements already adequately address this:
  - Service performance information (RPG 3, *Reporting Service Performance Information*)
  - Budgets (IPSAS 24, *Presentation of Budget Information in Financial Statements*),
  - Information on longer term resource availability (RPG 1, *Reporting on the Long-Term Sustainability of an Entity’s Finances*)
  - Discussion and analysis of financial performance and position (RPG 2, *Financial Statement Discussion and Analysis*)
7.2.4 Presentation of Information about Heritage

• Examples of reporting by galleries/museums:
  – “Te Papa” (New Zealand) annual report 2017/18
  – The “AGO” (Ontario – Canada) link to financial statements & year in review

• Non-financial information in each report: Addresses specific needs. (Driven by environment, relationships, and accountability)

• Buildings: Recognized as assets and on the statement of financial position

• Museum collections:
  – Te Papa recognizes its collection (in the statement of financial position)
  – AGO discloses information in Notes about purchases/sales of collection items
• Does the IPSASB agree that the Heritage Project’s primary focus going forward should be on information presented in the financial statements?
Next steps

- Focus on recognition application guidance (to include in IPSAS 17, *Property, Plant and Equipment*)

- Heritage Task Force will submit recommendations on heritage asset recognition to the June 2019 IPSASB meeting
