Agenda Item 6: Public Sector Measurement

David Watkins and Gwenda Jensen

IPSASB Meeting
December 5–8, 2017
Toronto, Canada
Overview

1. (a) Outlines for exposure draft (ED), consultation paper (CP)
   (b) Project route map
   (c) Discount rates

2. Review approach with examples

3. Public sector measurement – context for information
Issue 1

- Outline Exposure Draft
- Outline Consultation Paper
- Revised Project Roadmap
- Discount rates
Issue 1, Outline Exposure Draft

- Outline is provided as agenda paper 6.3.1
- Key points to note are in paragraph 4 of paper 6.2.1
- Comments sought from the IPSASB
Issue 1, Outline Consultation Paper

- Outline is provided as paper 6.3.2
- Key points to note are in paragraph 5 of paper 6.2.1
- Proposal is that material will be included in the CP only where it is necessary to explain the IPSASB’s thinking
- Comments sought from the IPSASB
Issue 1, Revised Project Road Map

- Paragraph 6 of paper 6.2.1 and paper 6.1.3 refer
- No decision required at this meeting re Route 1 or Route 2
- Both routes lead to combined ED/CP in December 2018
- Route 1 leads to PS Measurement IPSAS in March 2020, with consequential amendments by June 2021
- Route 2 leads to IPSAS containing all material by June 2021
Issue 1, Discount Rates

- Paragraphs 7 and 8 of paper 6.2.1 refer
- Several projects underway elsewhere
- Some projects due to report in 2018
- May be scope for including in ED/CP
Issue 2, Review Approach

Does the IPSASB agree:

• With the review approach? (See agenda paper 6.2.2)
• Recommendations on measurement in:
  – IPSAS12, Inventories
  – IPSAS 16, Investment Properties
  – IPSAS 19, Provisions, Contingent Liabilities and Contingent Assets?
Issue 2, Review Approach

• Review approach has three components:
  – Public sector measurement needs override (Task Force will highlight areas for IPSASB consideration)
  – No change to “basic measurement rule” in each IPSAS
  – Apply rebuttable presumption that “fair value” has same meaning as in IFRS 13, *Fair Value Measurement*, in IFRS–converged IPSASs

• *Note*: Need to align approach with ED-Outline (Issue 1)
(a) Public sector specific measurement needs:

- IPSASs 12, *Inventories*, and IPSAS 16 *Investment Property*:
  - Initial measurement at fair value when acquired through non-exchange transaction (revision to original IFRS)
  - Transaction costs and borrowing costs (project issue)
  - IPSAS 12: Subsequent measurement; inventories provided at no or nominal cost

- IPSAS 19, *Provisions-Contingencies*: Discount rates (project issue)
(b) No change to “basic measurement rule”:

*IPSAS 12*: Cost, then lower of cost & net realizable value

*IPSAS 16*: Cost, then choose either fair value model or cost model

*IPSAS 19* - provisions: Best estimate of expenditure required to settle the present obligation at the reporting date
(c) Rebuttable presumption-fair value has IFRS 13 meaning:

**IPSAS 12:** Reference to “fair value” inserted to address PSS issue, and will require consideration

**IPSAS 16:** Fair value has IFRS 13 meaning

**IPSAS 19:** Not an issue for IPSAS 19. (Only reference in implementation guidance and IFRS 13 meaning appears to apply.)
Issue 3, Public Sector Measurement

- Agenda paper 6.3.1 explains that CP’s content will reflect IPSASB’s thinking for the ED
- So, context in agenda paper 6.3.4 is for information:
  - Relevance of information in other reports (for measurement of assets and liabilities in the financial statements)
  - Conceptual Framework’s coverage of measurement
  - IPSAS measurement—an overview (Where is the potential for inconsistency with the Conceptual Framework?)
Next steps: See route planner and ED outline

• Approval of draft ED sections on:
  – Objective
  – Scope (assets, liabilities)
  – Definitions
  – Measurement on Initial Recognition (How to determine historical cost, treatment of transaction costs and borrowing costs)

• Any related CP material (Depends on IPSASB thinking on ED sections)
